LA GRIPPE
PNEUMONIA

IN WINTER

SUNSHINE ALL THE TIME!

OUT OF DOORS EVERY DAY!

BALMY NIGHTS!

NO MOSQUITOES!

NO MALARIA!

FLORIDA'S DRY SEASON

Added, for the Sick, a Residence in Dr. Bohannon's Hospital and Sanitarium.

REALIZING keenly the need of a place in Florida for the sick, Dr. C. C. Bohannon some years ago established this hospital and sanitarium, selecting for its location one of the prettiest and most quiet avenues. There are twenty-six airy rooms with white furnishings, colonial verandas and a shady lawn completing a most attractive place. A heating plant for the occasional chilly morning, and electric lights and call bells in every room. Electric treatment, baths and massage are added features for the comfort and well-being of the patients. A house physician is always in attendance.

RIDGEWOOD AVENUE, DAYTONA

DAYTONA.

A city set in the midst of live oaks, palmetto palms magnolias and pines. The entire city is a great natural park, stretching along the picturesque Halifax River for three miles. Daytona is not so far south as to be enervating in the winter nor is it so far north as to be damp and chilly. The great number of cloudless days is truly wonderful and it might well be called nature's sanitarium. Three bridges connect with that most beautiful of all beaches—the famous Ormond-Daytona automobile course. The roadways are so good that they attract automobilists from everywhere. Daytona is about seventy miles south of St. Augustine and one mile from the Atlantic Ocean. It is a most fascinating place and is visited yearly by thousands.

THE HOSPITAL AND SANITARIUM

THE OBJECTS OF THE HOSPITAL AND SANITARIUM.

Places IN FLORIDA for the sick are few, perhaps this is because Florida is healthful and has one of the lowest death rates of any state in the union. People do become ill, however, in Florida, as with the rest of the world, and during the winter months many people who are not strong come from other states. In consequence we have provided A PLACE FOR THE SICK.

Physicians may bring their cases here entirely under their own care or put them under ours. The wishes of the home physician are religiously observed.

The Hospital and Sanitarium is run on broad lines and is open to all patients not suffering from objectionable or contagious diseases.

Our objects are to give treatment that may be required, and to follow up that treatment; to give surgical aid when necessary and proper care thereafter; to give laboratory examinations when indicated and to instruct patients regarding their diet and lives after leaving the institution WE HAVE NO FADS.

VIEW OF THE FAMOUS DAYTONA BEACH.

ESPECIALLY ADAPTED.

Physicians and the public everywhere are invited to place our climate and this institution at their disposal. Every physician has patients who should spend their winters in Florida in charge of competent physicians. Nearly every family has some member who should spend several months each year in Florida. Correspondence is solicited regarding these cases, and the large class of aged people who exist only indoors in the North during the winter months, there trying to avoid la grippe, bronchitis, asthma, the rheumatic diseases, etc. We particularly recommend our institution for the comforts and quiet of home, which can not be obtained amidst the distraction of hotel life. The added supervision of the case by competent physicians and daily care given are indispensable.

HOW TO REACH DAYTONA.

Daytona, Florida, is located 110 miles south of Jacksonville on the Florida East Coast Railway. Through fast Pullman service over the Seaboard and Atlantic Coast Lines. Close connections with the Clyde Line from New York and Boston, and the Merchants and Miners Line from Baltimore and Providence, at Jacksonville.

RATES AT THE HOSPITAL AND SANITARIUM.

Rates vary from \$20.00 to \$35.00 per week. It is better to have correspondence covering the requirements of the case.

Prospective patients are requested to write or wire us before reaching Daytona, that we may make reservations for them and meet them at the train with suitable conveyances.
